- 1. In October 1952, the Berliner Technisches Buero of SAG Transmasch placed an order with the Zeiss-Ikon firm in Dresden for the construction and delivery to BTB of a camera capable of making one billion exposures per second. Zeiss-Ikon rejected the order as being impossible of fulfillment.
- 2. Negotiations between BTB and Zeiss-Ikon resulted in February 1953 in Zeiss-Ikon's agreement to undertake the construction of a camera able to make one million exposures per second. Reiss-Ikon said that delivery of the instrument could not be made before the end of 1954.
